HOLMENKOL LUBEnSPEED+glide – NEW hi-tech gliding seal for all moving metal components

Smoother running fittings with HOLMENKOL LUBEnSPEED+glide

HOLMENKOL's latest innovation is the hi-tech, high performance gliding and lubricating product which can also be used in sailing.

LUBEnSPEED+glide has been developed using the very latest nanotechnology and allows fittings to function faster and with reduced friction. This means that all watersports enthusiasts can benefit from enhanced enjoyment of the sport and a strengthened competitive edge in racing events.

LUBEnSPEED+glide offers outstanding corrosion and wear resistance and has unique penetrating characteristics. This high performance gliding agent can be applied sparingly as a result of its extremely high yield. It leaves no oily residues on surfaces and has a high level of dirt-repellence. Only ultra-thin layers are required. This means that the lubricant is barely noticeable and build-up is prevented.

HOLMENKOL Sport-Technologies is one of the oldest manufacturers of ski wax in the world and since 2002 has specialized exclusively in the development and worldwide marketing of highly innovative and environmentally friendly sports coatings based on state-of-the-art technologies. In 2004, HOLMENKOL was included in the "Top 100" list of most innovative medium-sized companies in Germany. In 2003, the NANOWAX product range was chosen as the No. 1 nanotechnology product worldwide by the US business and finance magazine FORBES. Further information on the company and its products can be found on the following website: www.holmenkol.com
