HOLMENKOL NoFog+clean – advanced product range of the newest nano-anti fogging coating

Optimized version for anti-fogging

Ditzingen, 20 January 2005. HOLMENKOL presents the newest version of NoFog+clean of its Advanced Protection range.

All kinds of glass, ski and special goggles and visors can be cleaned effectively. The nanoparticles coat the surface and prevent it from staining up. The product can also be used for the insides of windows and for mirrors.

From February 2005 HOLMENKOL offers an additional 20 ml atomiser besides the 100ml atomiser in order to ensure the fine and therefore correct application on small spaces (eg. goggles).

So HOLMENKOL offers a flexible, nano-based anti fogging product for each of its customer to serve the individual demands.

NoFog+clean is exhibited at ISPO winter 2005. Visit HOLMENKOL truck in the atrium between hall A and B.

HOLMENKOL Sport-Technologies is the oldest ski wax manufacturer of the world and exclusively specialized on the development and the commercialization of highly innovative and environmentally friendly sports coatings based on the newest technologies since 2002. HOLMENKOL was awarded to be one of the 100 most innovative medium-sized companies in Germany 2004. 2003 the NANOWAX product line is awarded to be the no. 1 nanotechnology product worldwide by the FORBES magazine. More information about HOLMENKOL and the products you can find on our website www.holmenkol.com.
