

HOLMENKOL PowerImpregnation+active – nano impregnation for large surfaces

Protection for large fabrics

Ditzingen, 20 January 2005. PowerImpregnation+active from the HOLMENKOL Advanced Protection Range provides high-tech, nanotechnology-based impregnation for all large-area textile fabrics such as tents, tarpaulins, sun umbrellas, sails and awnings.

The treated fabrics become water, oil and dirt-repellent. At the same time, PowerImpregnation+active is actively effective against mould and mildew. The product is particularly suitable for nylon, polyester, PU and modern mixed fabrics used in the sports and outdoor sector. And, of course, the breathability of functional fabrics is maintained.

Thanks to nanotechnology HOLMENKOL was able to reproduce the characteristics of the self-cleaning lotus flower.

PowerImpregnation+active provides sports and outdoor fans with an innovative product which impregnates high-quality equipment in an effective and long-lasting manner.

PowerImpregnation is exhibited at ISPO winter 2005. Visit HOLMENKOL truck in the atrium between hall A and B.

HOLMENKOL Sport-Technologies is the oldest ski wax manufacturer of the world and exclusively specialized on the development and the commercialization of highly innovative and environmentally friendly sports coatings based on the newest technologies since 2002. HOLMENKOL was awarded to be one of the 100 most innovative medium-sized companies in Germany 2004. 2003 the NANOWAX product line is awarded to be the no. 1 nanotechnology product worldwide by the FORBES magazine. More information about HOLMENKOL and the products you can find on our website www.holmenkol.com.
