

PRESS - RELEASE

A state-of-the-art nanotechnologic cleaner and sealer

The better protected boat with SportPolish+clean

Mets 2005, Amsterdam. HOLMENKOL SportPolish+clean is an innovative nanotechnologic cleaner and sealer coating gelcoats, GFR, carbons and metals.

SportPolish+clean is the different polish that cleans, seals and optimizes surfaces. Additionally it protects up to a years time against environmental influences.

The polish contains finest abrasive components and takes away dirt in a first step, in a second step, in which the surface has to dry about 20 minutes and during which the surface structure organizes itself, a so called nanotechnologic „intelligent surface“ is generated. The third step is the polishing of the coating where the released dirt is polished away and a high gloss surface is set up.

The surface is long-term protected from weathering, against attachments of organic origins like algae or moss, yellowing on waterlines, decoloration and protected against damage through salt and emissions. The surface becomes shining and well-maintained because of SportPolish+clean's colour refreshing properties.

The final coating shows a nanotechnologic intelligent surface of app. 1/100.000 mm thickness supplying a long term protection shield against oil, dirt, acids or bases. It is a so called "easy-to-clean surface" that can easily be cleaned without any aggressive cleaners. This highly abrasive resistant layer reduces maintenance work on gelcoats to an absolute minimum, doing the job of cleaners, polishes and waxes in one go.

SportPolish+clean is designed for application on all gelcoats, GRP's, Carbons (CRP's) and metals e.g. hulls, decks, fittings, masts and booms.

*HOLMENKOL Sport-Technologies is one of the oldest manufacturers of ski wax in the world and since 2002 has specialized exclusively in the development and worldwide marketing of highly innovative and environmentally friendly sports coatings based on state-of-the-art technologies. In 2004, HOLMENKOL was included in the "Top 100" list of most innovative medium-sized companies in Germany. In 2003, the NANOWAX product range was chosen as the No. 1 nanotechnology product worldwide by the US business and finance magazine FORBES.
